

Multitouch Training & Services

TRAINING DAYS – LEARN TO DESIGN AND IMPLEMENT MULTITOUCH SYSTEMS

Multitouch systems are multifaceted and to effectively design, build and set up a multitouch project it is necessary to understand the technologies involved, the relationship between screen technologies, optics and software.

Evoluce is offering training days at its Munich headquarters aimed at integrators and developers on following days:

Agenda:

- > Principles of Multitouch Systems
- > Hardware configuration
- > Multitouch Input tracking software
- > Interfaces to applications
- > Hardware set-up
- > Software set-up

After the training day you will be able to design and implement practical Multitouch installations.

Attendance fee: **€ 980.00, including lunch**

50 % refund on one order with a value of € 2,000.00 or more within 3 months after the training course!

Please send us your contact data for registration to: training@evoluce.com

Services:

When you are developing a special multitouch application we can help. Our technical team of software and hardware engineers along with a variety of multitouch test rigs are available for proof of concept testing for your hardware and software design.

We offer:

- > Development of Multitouch Software (API, fiducials, etc.)
- > Development of Multitouch Hardware incl. special screen surfaces with haptic layers
